

INCREASING ACCESS TO HEALTHCARE

Through Retail and Corporate Settings

Currently, there are many innovative approaches to filling gaps in healthcare services. Retail settings now offer e-visits, direct-to-consumer telemedicine, and even urgent care. And at some companies, employees even receive health services from their employers. Through these various retail models, consumers are able to take ownership of their health and wellness. This is significant, because traditional medical and dental offices often create barriers through delayed appointment scheduling, hidden costs for services, or restrictions in provider availability.

Keys to Success: Convenience and Access

As our society gets busier, DOCS recognizes the need for providing more convenient and accessible healthcare. Our commitment to health and wellness in retail and corporate settings is designed to improve access to care and create more options for our *members* — where they live, work, and shop. By removing the barriers to optimized health, our direct-to-consumer solutions improve outcomes that positively impact costs, accessibility, and time-savings.

As a full-service healthcare organization, DOCS can efficiently customize programs into retail and corporate settings with solutions that meet specific needs and demographics. Delivering any service needed, we maintain the highest standards of medical and dental care, while also providing specialty services such as chiropractic and pain management, vision care, care coordination, and urgent care.

DOCS Partners with AAFES

As a trusted brand, DOCS delivers care to military families, retirees, and veterans at Army & Air Force Exchange Service (AAFES) installations worldwide. In addition, DOCS Dental supports the BE FIT program through AAFES to ensure military families, communities, veterans, and retirees receive high-quality dental care worldwide.

Benefits of Working With DOCS

- DOCS specializes in bringing healthcare services directly to **consumer and employee populations**.
- Decades of experience in serving **military families and active-duty personnel**.
- **Patient-centric model**, in which patients are a part of the care team, as an equal *member* in all decisions related to their health.
